thus pollution and which I think to be not quite probable that with a proper survey some adequate means can be found to divert the flow of drainage and thus prevent further pollution at a comparatively small expense. The conditions are such that there is no doubt that the above measures will be found to be the proper ones and it is my opinion that it will be found that the above measures will be found to be the proper ones and it is my opinion that it will be found that the above measures will be found to be the proper ones.

The first consideration is that to accept the rule before the first part of the season would mean that the average should be based on a small number of observations, and this would be of no use at all. It would be better to wait until the end of the season, when there will be a sufficient number of observations to base the average on. This is the view of Mr. Thompson.

Oversight of the P. O.

REPORT OF GYPSY AND BROWN TAIL MOTHS

To the Honorable Board of Selectmen:

I find for the year 1917 that the gypsy moth colonies are about the same as in 1916, but that the egg clusters are not more than one half as many as in 1916 in all infested areas. All wood lands are infected in town of Mills.

There are several wood lands that must be sprayed in 1918 to safeguard adjoining property owners.

Liabilities on these lots will cover expense of work to be performed on same.

I find that the parasites liberated by the government in wood lands are doing excellent work. This accounts for the decreases in egg clusters in wood lands. As there are several of these parasites the government and state have ordered that breeding in wood lands be stopped when possible to take care of same in other ways.

There are a number of estates to be sprayed by owners. Request for suppression of gypsy moth in 1918.

I also find that the brown tail moth is very scarce. I having found only a few nests so far this year.

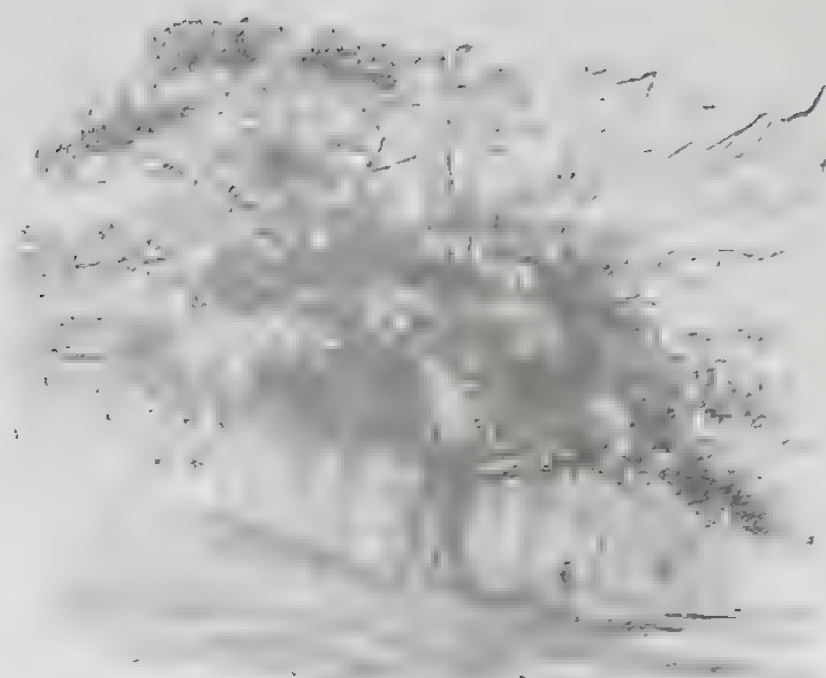

I would recommend that the town buy a large sprayer for 1918 as the sprayer now owned by the town cannot possibly take care of the work to be done in 1918, as it will require a heavy duty sprayer to take care of the wood lands.

SUPERINTENDENT'S REPORT.

To the School Committee of Millis.

Good schools are chiefly the resultant work of good teachers. An all important duty of school officials is to see that such teachers are enabled to carry on their work under favorable conditions. Courses of study, reports, suggestions, should all tend to make the administration of the schools as simple and effective as possible.

The state course of study for elementary schools is a most valuable outline. It applies, however, to the first six grades only. The course for the seven and eighth grades must be derived from other sources. Some cities and towns have organized the seventh and eighth grades as a Junior High School. This arrangement allows pupils of these grades to choose certain advanced studies making the complete High School course six years. The Junior High School organization is represented mainly in the larger cities and towns having greater facilities for investigating educational problems. We may not infer that communities not having this plan are non-progressive. Many intelligent parents prefer for their children eight years in the Grammar School and a diploma with four years in the High School to the so-called "Six and Six" plan.

In connection with the course of study teachers in the grades have prepared each month a brief statement of work emphasized in Language, Arithmetic, History and Geography. This constitutes part of a "Monthly Progress Report" showing conditions in the schools. The pupils have also furnished monthly sets of papers illustrative of the work done in the different studies.

Formal examinations to determine a pupil's fitness for promotion have undoubtedly been misused in many elementary schools. Proper test, however, may help to show what points in teaching need to be emphasized, and may also indicate in some degree, progress and attainment. Examinations at mid-year in Language, Arithmetic, History and Geography are to be given to all pupils from the fourth through the eighth grade. By obtaining an average of 75 per cent in daily work and mid-year examinations a pupil need not take a final examination.

The chief object of the public schools is to prepare boys and girls for better living and better citizenship. The fundamentals: Language, Arithmetic, History and Geography must be carefully taught and emphasized throughout as the tools for all further acquisitions of knowledge. Manual training and physical exercise are indispensable parts of a true education. A careful course in Manual and Physical training is most desirable for all schools. Much of the work in drawing is valuable manual training and may be emphasized as such. Simple gymnastic exercises, singing, correct standing and sitting position all offer opportunities for physical culture.

The demands upon teachers are often many and burdensome. The course of study, conventions, teachers' meetings and school visitation may inspire, but the teacher must do the work. The greatest help teachers can receive is the sympathy and support of parents and school authorities.

Respectfully submitted,

ALBERT S. ANNE

Superintendent.

Report of Supervisor of Music.

Mr. A. S. Ames, Supt. of Schools.

During the past five years the Weaver System in music has been employed in the schools with satisfactory results. Many of the boys and girls are doing good work in music and others show marked improvement from year to year.

If music is introduced into the school as a *subject*, simply for the purpose of perfecting the fact that a school is up-to-date and progressive in its method, it is bound to have satisfactory results on the work in general. The subject of music is gradually being recognized as an *essential* subject, a training in which is necessary to the proper development of every child or boy. The ability to sing and understand good music is a source of pleasure and gives to life a means of recreation. The influence of good music is always refining and elevating.

To quote Phillips Brooks: "A school song in the heart of a child will do as much for his character as a fact in his memory, or a principle in his intellect."

I wish to extend to the teachers my appreciation of their efforts to gain satisfactory results in our work.

Respectfully submitted,

CARROLL F. THAYER

Supt. of Music.

Report of Supervisor of Drawing.

Mr. Albert S. Ames, Superintendent of Schools.

The same general plan of work in drawing has been followed during the past year in the grades. The average boy and girl should be able to make plan drawings, and to make fair representative drawings, and to work out simple design problems by the time he leaves the eighth grade.

A class in advanced drawing has been started this year in the High School for the benefit of those taking the college course. The work includes mechanical drawing and design.

With the continue daily efforts of the teachers the work is advancing satisfactorily.

Respectfully submitted,

HELEN M. ALLEN.

Report of Principal.

Mr. A. S. Ames, Supt. of Schools.

In submitting to you my report as principal of the High School, I wish first to thank you and the school committee for the unstinted support given me in school work this year.

In the organization of the High School there has been little change. We have now firmly established three distinct courses of study, namely: College preparatory, general and commercial. No changes has been made in the subjects offered except that Community Civics and General Science have been made half-year courses instead of yearly ocurses.

At the beginning of the school year a change was made in the afternoon session which now begins at one o'clock and by omitting an afternoon recess closes at three. This changes enables the pupils from Rockville to go home on the three o'clock car instead of having to wait until four o'clock.

At this time when so much is heard of "doing your bit" it may not be amiss to mention the fact that the High School has "done its bit" to help win the war. Through the efforts of the Girls' Glee Club and other members of the school, about \$85.00 was realized for the benefit of the soldier and sailor boys of Millis. The High School as a whole gave \$25.00 to the Y. M. C. A. fund.

Finally, through you, I want to thank the teachers with whom I have worked for their co-operation in all the work of the school year.

Respectfully,

R. P. CHAMBERLAIN.
